

## **Build wealth on the web3**

In this course, we will introduce you to different ways you can build your wealth, especially with cryptocurrencies and NFTs.

This course is divided into the following modules:

1. Basics: Here we present the basics of building wealth
2. Products: There are new products every week in the Web3 Space. We present you with a selection.
3. Strategy: How to go about it now? We explain strategies to you
4. Practical implementation: In this module we give you tips and use cases for practical implementation.

Please always remember that you should only invest money.

We wish you lots of success and fun with your new experience in this asset class.
