

5 reasons why bitcoin and other cryptocurrencies have value ?

Have you ever wondered why cryptocurrencies like Bitcoin have any value at all?

We show you 5 reasons:

1. Scarcity - There will never be more than 21 million Bitcoin
2. Speed & limitless: Bitcoin is a very fast and simple means of exchange and payment. You can send and receive bitcoins anywhere in the world in seconds
3. Freedom: Bitcoin cannot be controlled by any government, bank or any other entity.
4. Transparency: You can track where your bitcoin came from and where it is going at any time
5. Decentralized: The code and its information are distributed globally on multiple servers

You can see that Bitcoin has many values here that cannot be compared to our fiat money like euros or US dollars. These are all reasons why bitcoin has value
