

## **Risks and Opportunities of Cryptocurrencies!**

Cryptocurrencies are still in their early times compared to other products and sectors, and like any investment, there are risks with cryptocurrencies as well as opportunities.

### **But what are the risks of cryptocurrencies?**

1. High price fluctuations (high volatility)
2. Inconsistent or still insufficient regulation
3. Meme coins in circulation
4. Cryptocurrencies are complex.
5. Lots of scammers and SCAM projects on the market

### **What chances are there?:**

1. New technology
2. It connects people globally and gives access to all people in the world (no one is excluded as is possible with bank accounts)
3. We are just at the beginning, you have a chance to be part of something big like when the internet started in 1997.
4. The community decides
5. 100% International - Money can be sent anywhere in the world from Australia to America in seconds.

Despite the risks we point out, the opportunities outweigh the risks from our point of view, but do your own research.

You have to watch what you invest in and understand that.

With CryptoClue we would like to contribute our part to education.
