

Coin's introduction

There are more than 12000 cryptocurrencies and the number is growing every day. New currencies appear and others disappear from the market.

In this course we will give you an overview of the top 20 coins (as of November 2022) – for example the 20 largest cryptocurrencies by market capitalization, introduce you to the projects and give you exciting facts along the way.

In addition, you will always find current videos on selected “trend coins” and “gaming cryptocurrencies” in this course.

The course is expanded every month, because on the one hand the crypto market is very fast-moving and the top 20 coins change from time to time and on the other hand exciting new cryptocurrencies are added.
