

Introducing Module NFT Collections

There are thousands of NFT projects and new ones are added every day.

But which one is the right one for me to invest in, what benefits do I get and where do I have to be careful. Because there are also many scam projects in the NFT market.

In this module we regularly introduce you to Blue Chip and exciting NFT projects. Each NFT collection comes with a different utility. There are different benefits and types of NFT collections.

With the purchase of an NFT, you are participating in a startup!

It's an exciting new time and there are great use cases - we'll show you exactly these in this module.

If you have any questions, please contact us in the Discord or on Wednesdays in the CryptoClue Premium Q&A call.
