

Step-by-step instructions to get you started

In the previous videos you got to know different ways how you can earn money on the web 3 - actively and passively.

How are you going to implement it now?

1. Determine your strategy:

With which possibilities do you want to earn money and when?

For example, while you can start staking right away, it will take a few months to build a Web3 agency

2. Prioritize

What do you do first and by when? It is usually not possible to do everything at once. focus is important. So determine which activities you do first. As an example:

Staking start immediately, affiliates on 1.12. and own Web3 agency on February 1st, 2023

3. Start

It is important to just start and not dwell on the theory for too long. You learn a great deal when you try out the individual products

4. Review

Every 3 months, review what went well and what could have gone better. For example, whether you are satisfied with the exchanges you have chosen. Check the conditions on an ongoing basis and switch exchanges if necessary. If you are planning to be self-employed, check how you are progressing here and whether you have achieved your goals.

Keep what works well and change what doesn't.
