

Make money in web3 - 7 strategies

There are many ways to make money in the Web 3. In this video we give you an overview of 7 areas, which we then explain in detail in individual videos and give you practical tips for implementation.

We distinguish between active and passive sources of income for Web3 sources of income. There are ideas for private individuals as well as for entrepreneurs.

What does active and passive sources of income mean?

Active means: Your workforce is actively challenged!
You have to constantly do something to earn money!

Passive means: you have to do little or nothing for it. You will receive income automatically!
However, this results in an initial effort!

Let's start with the active options:

- Become a creator and issue NFTs for your business
- Trading NFTs and Cryptocurrencies
- Scaling business
- Development of an own Web3 agency

In terms of passive options, we present the following:

- Crypto staking and lending
- Liquidity mining
- Web3 Affiliates

You can find out exactly what is behind the individual options and how you can use them for yourself in the next few videos.
