

128_Dos and don'ts Trading

Remember the following dos and don'ts for trading:

DOS

- Start with small amounts. There are no minimum amounts for cryptocurrencies. You can start with e.g. 10 EUR per month.
- Keep your passwords in a safe place and never give this to other people.
- Always invest within the scope of your own financial possibilities! Check out regularly and also make profits in between
- Observe your portfolio, learn and deal with the topic!

Donts

- Don't expect to get rich overnight. Even if many promise it on the Internet, very few will get rich overnight with cryptocurrencies. It is in long-term investment like stocks.
- Never invest more than you can afford to lose! Although you can win a lot of money by rising prices, you can also lose everything in the worst case.
- Beware of projects that make unrealistic promises! As in other areas, this also applies to the crypto area! Anything that sounds too good, please be careful and check it very carefully.
