These 5 AI tools are already automating your life!

The **AI Tome.app,** which uses ChatGPT and DALL-E, automatically creates presentations.
These can be adjusted, but sometimes appear in impressive quality.

The **AI Murf.ai** converts text into speech and lets you download the file as an .mp3 file, for example.
Different languages, genders and pronunciations can be selected.

The AI **Browse.ai** can extract data from a website.
For example, it is possible to track price changes or download entire lists such as Amazon bestseller books as a file.

The **flowcv.com** AI creates and shapes CVs based on the data you enter.

 The AI **pfpmaker.com** crops pictures so that you can use them as profile pictures and removes the background with one click.
