Introduction Course Artificial Intelligence

The field of artificial intelligence - abbreviation AI is becoming more and more present in our daily environment.

Whether it's automated chat programs like ChatGPT, Amazon's Alexa or robots that bring us food - many of these use cases are controlled by artificial intelligence.

In this course, you will learn the basics of artificial intelligence, areas of application and concrete examples of use in various modules. In addition, we present future projects to you. Through our CryptoClue branch in California, we are always close to the latest trends and explain them to you in the app.

Abbreviations and explanations of terms related to artificial intelligence can be found in our glossary in the app.

We wish you a lot of fun and success with this course.
