How to buy your first NFT

Finally the time has come. You want to buy your first NFT.
What do you have to do now?

We will walk you through the purchase of your first NFT step by step.

1. **Opening and setting up Metamask***
   a. only relevant if you do not yet have an account with a crypto exchange.
      Opening an account on a crypto exchange like Coinbase, Binance etc
   b. **Set up MetaMask (https://metamask.io):**
      i. Download MetaMask in your browser e.g. GoogleChrome and save it as an extension**
      ii. Set up a new account: assign a secure password, keep the seed phrase safe and secure.
      iii. Transfer of a test amount from your account at a crypto exchange on Metamask (test whether the currency arrives) - Attention, send everything in ETH on ERC-20 Blockchain.
         Important: If you send something else, your money will not arrive and will be lost
      iv. Once there, you can transfer the amount of ETH you need to buy your desired NFT onto the metamask
   c. **Open an account with an NFT exchange like Opensea or LooksRare. for example opensea (www.opensea.io)**
      i. Visit the opensea.io website
      ii. Connect your metamask (You will be automatically prompted to do so)
      iii. Enter e-mail and login data (Important: Use the e-mail address to which you would like to receive notifications about your purchases and sales. Enter user name and other information
   d. **Buy your first NFT**
      i. In the opensea search you can search for collections. Find the NFT you want to buy there
      ii. Click "Buy now". Then the price plus gas price is displayed and you have to virtually release in your MetaMask that you want to buy the NFT. Click on "sign".
      iii. Check if your new NFT is displayed in your Opensea.

Congratulations - then you have bought your first NFT
